PROFILE SUMMARY

Full-Stack Engineer based in Berlin with **5+ years of experience** building production web and mobile applications with **TypeScript, React, Next.js, React Native, and Node.js/NestJS**. Delivered customer-facing workflows, backend services, and real-time features; led backend development for a telecom platform serving **approximately 1M users**. Experienced in production reliability, architecture, and mentoring engineers.

TECHNICAL SKILLS

- **Frontend & Mobile:** React, Next.js, React Native, TypeScript
- **Backend & Data:** Node.js, NestJS, PostgreSQL, Redis, MongoDB, REST, GraphQL, TypeORM
- **Cloud & Delivery:** AWS (S3, Lambda, RDS, IoT Core), Google Cloud, Docker, CI/CD
- **Realtime & Integrations:** WebSockets, MQTT, SIP/VoIP, Firebase, OpenAI, Stripe, RevenueCat

WORK EXPERIENCE

Full-Stack Engineer **01/2024 – Present**
Kevych Solutions | Remote, based in Berlin, Germany

- **Telecom Platform (approximately 1M users):** Led **Node.js/NestJS backend development**, rebuilding **4 core modules** and delivering **4 new modules** for eSIM and phone-number provisioning, call routing, VPN, and SIP/VoIP integrations.
- **Web & Mobile Products:** Built **React/Next.js web applications**, **React Native mobile apps**, and admin tools. Delivered customer self-service workflows for account management, provisioning, and usage.
- **Ride-Hailing Reliability:** Modernized a legacy backend with event-driven workflows and **WebSocket-based live ride tracking**. Reduced recurring production issues from **several per week to several per month**, freeing engineering capacity for new features.
- **IoT Device Control:** Built real-time remote control for **approximately 1,000 production devices** using MQTT and AWS IoT Core.
- **Product Analytics:** Replaced Google Sheets reporting with a **Firestore-to-BigQuery pipeline** processing millions of records and a Looker dashboard, enabling more flexible reporting for management and marketing teams.
- **Engineering Mentorship:** Mentored **3 backend engineers**, reviewed code, and contributed to architecture decisions across production systems.

Full-Stack Engineer **07/2021 – 01/2024**
Appexoft | Lviv, Ukraine

- **Retail Pricing Product:** Built mobile and backend components of a production pilot that used **computer vision to recognize fuel prices** from roadside signage, providing retailers with competitor pricing data.
- **Mobile Price Management:** Delivered competitor price-monitoring workflows and **direct POS price updates**, allowing retailers to manage fuel prices from mobile devices.
- **Subscriptions & In-App Purchases:** Integrated **RevenueCat across iOS and Android** to support mobile monetization.
- **Production Reliability:** Resolved critical production issues and refactored legacy mobile and backend code.

EDUCATION

B.Sc. Computer Engineering **2020 – 2024**
Lviv Polytechnic National University, Ukraine (Anabin H+)

Courses & Additional

- **Courses:** TypeScript, JavaScript, React for result (Udemy, 2024); Front-end React JS Web Development Course (Apiko, 2024).
- **Languages:** English (C1), German (A2 - weekly lessons), Ukrainian (Native), Russian (Fluent).
